## 1. Executive Forensic Summary

|                            |                   |                         |                   |
|----------------------------|-------------------|-------------------------|-------------------|
| DETERMINISTIC THREAT SCORE | ASSESSED SEVERITY | ML PHISHING PROBABILITY | ML CLASSIFICATION |
| 80.0/100                   | HIGH              | N/A                     | NOT EVALUATED     |

API Test

## 2. Email Headers & Sender Alignment

|              |                            |
|--------------|----------------------------|
| From:        | phish@█api-█test.█com      |
| To:          | undisclosed-█recipients    |
| Subject:     | API Endpoint Phishing Test |
| Date:        | Unknown                    |
| Reply-To:    | None                       |
| Return-Path: | None                       |
| Message-ID:  | None                       |

|                     |                |                    |                        |
|---------------------|----------------|--------------------|------------------------|
| From Domain:        | N/█A           | Reply-To Domain:   | N/█A (Aligned)         |
| Return-Path Domain: | N/█A (Aligned) | Alignment Verdict: | Sender domains aligned |

## 3. Email Authentication Findings (SPF / DKIM / DMARC)

|                       |                  |                                          |
|-----------------------|------------------|------------------------------------------|
| PROTOCOL              | OBSERVED VERDICT | TECHNICAL DETAILS & EVIDENCE             |
| SPF (Sender Policy)   | UNKNOWN          | No SPF policy details extracted.█        |
| DKIM (Cryptographic)  | UNKNOWN          | No DKIM signature detected or va█lided.█ |
| DMARC (Domain Policy) | UNKNOWN          | No DMARC evaluation returned.█           |

## 4. Deterministic Threat Score Breakdown

No adverse threat factors identified. Analysis observed no high-risk markers.

## 5. NLP Content Phishing Classification

ML content assessment unavailable or email body empty. Deterministic forensic analysis continues unimpeded.

## 6. AI Analyst Assistant Synthesis

AI Analyst Assessment not requested or disabled for this analysis session.

## 7. Extracted Indicators of Compromise (IOCs)

### Observed URLs & Suspicion Scoring:

No URLs observed in email body or headers.

### Observed Attachments & Cryptographic Checksums:

No file attachments detected in this message.

## 8. Network Transmission Path & Topology

No sequential relay hops reconstructed from Received: headers.  
*Notice: Labeled strictly as observed infrastructure route. Does not represent physical attacker travel path.*

## 9. Infrastructure & Domain Intelligence

No public IP intelligence enriched for this email.

## 11. Prescriptive Recommendations & Containment Actions

- [ ] 1. Block observed sender address and domain at the secure email gateway (SEG).
- [ ] 2. Enforce domain-level DNS sinkholing for all identified suspicious/lookalike URLs.
- [ ] 3. Revoke active user session tokens if credentials were submitted to target endpoints.
- [ ] 4. Search tenant mailboxes for identical Message-ID, Subject, or attachment hashes to purge residual exposure.
- [ ] 5. Submit extracted attachment hashes to Endpoint Detection and Response (EDR) blocklists.

## 12. Evidentiary Limitations & Chain-of-Custody Certification

**Forensic Chain-of-Custody Certification:**  
This document is generated by MailTrace AI based on literal RFC-822 evidence headers. Public IP geolocation represents coarse regional estimates based on RIR allocations and does not establish street-level physical locations or the personal identity of the sender. All cryptographic hash sums (SHA-256) were computed over unaltered message byte streams and preserve complete digital non-repudiation chain of custody.
